

---

Emotional Support Animals or “ESA” are not allowed into the stadium. Service Animals are allowed under the following conditions.

The handler must have complete control of the service animal at all times while in the facility.

The handler is responsible for the service animal at all times; including any accidents, spills or clean up needed.

The service animal must be harnessed, leashed or tethered while in public places unless these devices interfere with the service animal’s work or the person’s disability prevents use of these devices.

All service animals are required to follow the Stadium and Campus policies while in the facility as the service animal is an extension of the member.
